

## 10-Watt TRIAC LED Power Supply

Phase-dimming transformer for interior applications

*Commercial Grade*

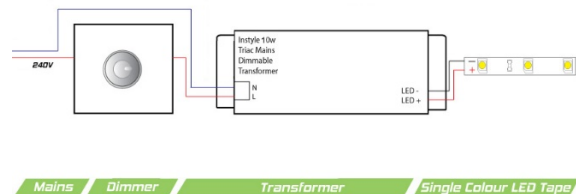

This high-quality 10W TRIAC-dimmable LED transformer is available in a 12v version only. Offering industry-standard phase-cut functionality, it enables dimming of white or single-colour LED strips using a standard household dimmer-switch. (Aurora's AU-DSP400X dimmer module and Varilight's V-Pro series are recommended.)

This low-power LED transformer is ideal for small installations/projects. It can power up to 10 watts of LED tape, with no minimum load. The transformer has a slimline design, making it easy to install unobtrusively, and it is compatible with lighting control brands such as Lutron, Rako and Crestron.

Input voltage 180-240v AC. Output voltage is 12v. This item is RoHS compliant and conforms to all UK safety standards.

### wiring / connections

#### **10w TRIAC Mains-Dimmable Transformer**

### quick spec sheet

Product code: TR-10-12

#### Physical construction

Colour	White
Materials	Plastic
IP Rating	IP20
Length	145 mm
Width	56 mm
Depth	19 mm

#### Electrical

Input voltage	180V ~ 240V
Output voltage	12V
Output current	0.83A (12V)
Output wattage	10W
