

400-Watt LED Power Supply (IP-Rated)

Transformer for exterior applications

Constant voltage

Commercial Grade

This 400-watt (24-volt) transformer for LEDs will drive up to 400W of LED lighting with no minimum load. The unit is suitable for use with both single-colour LEDs or colour-changing (RGB/RGBW) LEDs.

Fully water-resistant (to IP67 protection), this power supply is suitable for both interior and exterior LED installations. The unit is fully sealed with hardwired connections, so it is safe to touch, and with 2 x pre-drilled fixing points it can be installed in most locations. Very little heat is given off by the transformer, so it can be used in confined spaces.

Input voltage 220-240v AC. Output voltage is 24v.

This item is RoHS compliant and conforms to all UK safety standards.

quick spec sheet

Product code: EX-400-24

Physical construction

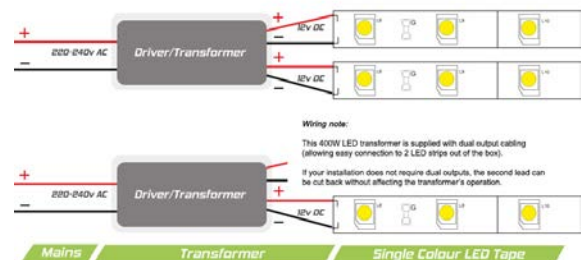

Colour	Grey
Materials	Aluminium
IP Rating	IP67
Length	253mm (276mm inc brackets)
Width	94 mm
Depth	50 mm

Electrical

Input voltage	220V ~ 240V
Output voltage	24V
Output current	8.33A
Output wattage	400W

wiring / connections

400 Watt Waterproof Transformer (IP67-rated)
