

80-Watt LED Power Supply

Transformer for interior applications

Constant voltage

Commercial Grade

Available in either a 12-volt or a 24-volt version, this 80-watt transformer for LEDs will drive up to 80W of LED lighting with no minimum load. The unit is suitable for use with both single-colour LEDs or colour-changing (RGB/RGBW) LEDs.

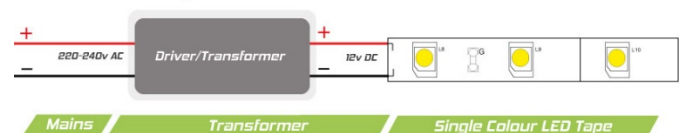

Although designed for use in interior locations (non waterproof), this power supply is also suitable for powering waterproof LED tapes (as long as the transformer itself is installed in a location free from moisture). The unit is fully sealed with hardwired connections, so it is safe to touch, and with 2 x pre-drilled fixing points it can be installed in most locations. Very little heat is given off by the transformer, so it can be used in confined spaces.

Input voltage 220-240v AC. Output voltage 12v or 24v (2 models).

This item is RoHS compliant and conforms to all UK safety standards.

wiring / connections

Connection Diagram

quick spec sheet

Product code: IN-80-12 / IN-80-24

Physical construction

Colour	White
Materials	Plastic
IP Rating	IP20
Length	218 mm
Width	48 mm
Depth	40 mm

Electrical

Input voltage	220V ~ 240V
Output voltage	12V or 24V
Output current	6.67A (12V) or 3.33A (24V)
Output wattage	80W
