Dimensions	1004x45x33 mm
Beam Angle	45°

Electrical

Voltage	24 volts
Wattage	96 watts / metre

InStyle LED's high-power RGBW LED wall washer is a stunning ultra-slim aluminium light baton.

Our most popular wall-wash product, this aluminium light bar is available in 0.5m or 1m lengths. By mixing light from its red, blue, green and white LEDs at source, the wall washer can create any shade of any colour you choose, producing vibrant colour washes (including pastels).

Drawing 96 watts and 24 volts, these wall washers are perfect if you're looking for ultra-bright lighting – powerful enough to produce brightness up to a whopping 6,000 lumens per metre!

With 24 RGBW LEDs mounted per metre, each with a 45-degree optic lens to extend the reach of its light, this wall washer is designed to give you a high-powered colour wash that can easily illuminate several metres down walls or across ceilings. Our wall washer is ideal for signage, hotels, restaurants, clubs and bars. And the sealed units are water-resistant and dustproof (IP65-rated), meaning you can install them both internally and externally.
